Dehradun

Mr Anil Kumar Sinha, IAS-Retd., Former Vice
Chairman Bihar State Disaster Management
Authority

Drinking water is a basic need for all living organisms and drinking water services become essential in ensuring the health and well-being of population. During emergencies such as disaster situations, it is imperative for these basic services are least affected and return to normalcy at the earliest. The impact of a natural disaster (physical, chemical or biological) can cause contamination of water, breaks in pipelines, damage to structures, water shortages, and collapse of the entire system. Depending on the level of preparedness that the concerned authorities have adopted, repair of the system can take days, weeks, and even months. By adopting strategic approach for designing drinking water supply system impact of disaster can be mitigated. In this Seminar we will be addressing the various possible disasters that can affect a drinking water supply system and the steps to be taken to avoid or address them.

Seminar Schedule

Time (hrs.)	Subject	Lecturer
