In order to set minimum requirements for water quality and distribution system, the standards are needed which should be followed by Water Utilities like Public Health Engineering Departments (PHEDs), Municipal Corporations and Jal Boards of the states and Union Territories responsible for supply of drinking water to the people of the country.

As the National Standards Body of India, BIS took the initiative and formulated Indian standards, i.e. IS 17482:2020 'Drinking Water Supply Management System — Requirements for Piped Drinking Water Supply Service' and IS 10500:2012 'Drinking Water – Specifications' for water quality, for ensuring sustained supply of drinking water.

In order to publicize these standards and to ensure that these standards get adequately implemented across the nation, this Seminar on 'Piped Drinking Water Supply System' is being organized.

We are extending an invitation to you to participate in the Seminar. There is **NO PARTICIPATION FEE** for attending the Seminar. You may forward the invitation to other organizations who would benefit from this Seminar.

### Objectives of the Seminar

1. To provide an overview on IS 17482:2020 'Drinking Water Supply Management System — Requirements for Piped Drinking Water Supply Service' and its implementation.
2. To provide an overview on IS 10500: 2012 'Drinking Water – Specification'.
3. To share existing infrastructure for testing quality of water among the stakeholders.
4. To spread awareness amongst the stakeholders about BIS Certification Scheme on IS 17482.
