**Structural Design and Proof Checking Consultancy Services for
Structures — Requirements**

As the National Standards Body of India, Bureau of Indian Standards takes this initiative to create awareness among the stakeholders about the need for standardization in structural design and proof checking consultancy services for structures. The need for correct structural design and proof checking of structural designs has been recognized as an important step in ensuring safety and durability of the structures. BIS under Construction and Related Engineering Services Sectional Committee, SSD 06 has published an Indian Standard **IS 18299:2023 ‘Structural Design and Proof Checking Consultancy Services for Structures — Requirements’**. This standard covers requirements of structural design and proof checking consultancy services for all types of civil engineering structures and also includes responsibilities, educational qualifications, and deliverables expected from all the stakeholders.

The Seminar will facilitate eminent speakers and domain area experts to share the best practices and their experiences in the field of structural design and proof checking consultancy services for structures and it would surely be enriching for the delegates.

We are extending an invitation to you and your organization to participate in the seminar physically with the facility to join virtually as well. There is **No Participation Fee** for attending the Seminar. **You may forward the invitation to other organizations/stakeholders who may be interested in this Seminar.**

OBJECTIVES OF THE SEMINAR

1. To create awareness among the stakeholders about the need for standardization in the field of Construction Services, with focus on structural designs and proof checking consultancy services of structures.
2. To share the current practices being followed in structural design and proof checking.
3. To make the stakeholders aware about benefits of complying with the standard.
4. To provide an overview on the Indian Standard IS 18299:2023 on ‘Structural Design and Proof Checking Consultancy Services for Structures — Requirements’.
5. Identify new areas and subjects for standardization in the field of Construction and Related Engineering Services.
