

Engagement with Industry

The engagement of BIS branch offices including JPBO 1 with industries at the local level is crucial in promoting industry awareness, facilitating adoption of standards, and addressing industryspecific needs. Through their outreach efforts, guidance, training programs, and industry collaboration, branch offices contribute to the overall growth and development of industries in their regions. During 2022-23, JPBO 1 organized many programmes for the industry, this included 4 Capsule Courses for Quality Control personnel (95 Industry personnel trained) and many awareness programmes for product certification licensees.
